DESIGN AND CREATION.

Every company wants to stand-out in a crowd. That is why visual identification is so crucial for any enterprise. In TechState our design experts will serve all your needs in the field. We provide services such as: logo and brand book creation, video and motion materials, retina ready designs along with high quality UI/UX.

SKÆR

MOBILE APPS.

Android

With an 80% share of the global market, Android remains the most popular operating system when creating mobile applications. They are an integral part of a smartphone, tablet or TV

iOS

The iOS operating system is the second most popular solution used by mobile devices after Android. The popularity of both systems requires entrepreneurs to adapt their offer to both groups of recipients.

SOFTWARE ENGINEERING.

We create tailor-made software. In our daily work, we use the latest technologies that allow us to achieve exactly the effect that the client expects. Make an inquiry and find out more about our possibilities.

CYBER SECURITY.

InfoSec

At TechState we implement the most advanced cybersecurity technologies in the areas of attack and defense. Thanks to our extensive experience in many industries related to information security, we are able to better understand the implementation of each attack and protection technique.

I've seen things you people wouldn't believe. All those moments will be lost in time, like tears in rain. Time to die.

Social Media

Social media create many opportunities for companies, including reaching new customers with advertising. However, the greatest value is the ability to create long-term relationships with them through their social networks.

Advertising

It cannot be concealed that an online advertising campaign is a quick and effective promotion of a given company on the web. Website is not enough, it is more important to encourage customers to use services or make purchases.

DIGITAL MARKETING.

SEO

Search Engine Optimization involves taking specific actions to raise the website position in the search engine results for specific phrases related to the topic of the site. It is a long-term operation, most often the effects appear after a few to several weeks from the start, but they are long-lasting and stable.
